

PROTECTING AMERICA'S FUTURE

FE

SCHOOL BUS

IC CORPORATION IS A WHOLLY OWNED SUBSIDIARY OF INTERNATIONAL TRUCK AND ENGINE CORPORATION.

## A BUS THAT PUTS CHILDREN FIRST.

(BUT DRIVERS, FLEET SUPERVISORS,  
SCHOOL ADMINISTRATORS  
AND MECHANICS AREN'T FAR BEHIND.)

Confidently delivering students to and from school is one of the most important jobs in the world. The FE school bus was designed and built accordingly.

From bumper to bumper and roof hatch to pavement, the FE earns high marks in comfort, reliability, driveability, ease of maintenance and value. You even get the service and support of an extensive dealer network across North America.

SCHOOL BUS

## HEAD OF THE CLASS.

- Threaded body construction delivers outstanding strength and durability.
- One-piece body bows bring improved roof fit and finish for greater structural integrity.
- Heavy-duty 60,000-psi frame rails provide less deflection for improved ride and body support.
- Standard 16-gauge steel body panels provide strength and rigidity.
- The patented integrated crossing arm motor is protected by flush mounting within the bumper for dependable operation, in all weather.
- Standard hydraulic disc brakes do not require disassembly of the caliper to replace linings or rotors. ABS brakes are standard. Optional air brakes are available.

- The electrical system on the integrated chassis and body features fully electronic gauges that plug in/pull out for easy serviceability, and color-coded, continuously numbered electrical wiring to simplify inspections and repairs.
- Optional side storage compartments provide additional storage.

- Hidden hinges on the side and rear emergency doors are protected from weather and road damage for longer life.

- One-piece fixed engine interior access cover with easy-open panel for quick CDL checks.
- The standard engine, the legendary International® DT 466E, delivers unmatched power, performance, reliability and economy – running longer between scheduled maintenance, delivering excellent cold-weather starts and meeting strict emissions standards.

TO MAKE AN  
OUTSTANDING INTERIOR  
ENVIRONMENT, WE  
REALLY DID  
OUR HOMEWORK.

- The instrument cluster location enables the driver to more easily monitor road and bus conditions.
- Standard adjustable steering column increases driver comfort and ease of turning.
- Smartly located switch panel features easy-to-read switches for easy operation.
- The accelerator and brake pedals are positioned for maximum comfort and utility.

- The widest entry door in the industry and three-step entryway give the driver a clear view to the curb and riders an easy path for entry/egress.
- The clear-view door – the lightest door in the industry – enhances driver visibility and ease of operation.
- Patented dynalastic engine mounts, soft-ride suspension package and generous sound-absorbing material deliver a quiet and comfortable ride.
- Standard variable-rate rear springs and heavy-duty front shock absorbers isolate passengers and driver from harsh roads. Rear air suspension available.
